|-------------------------------|-----------------------------------|
| A. An office at home | D. Computers for building up team |
| B. Computers for making films | E. Driving in the future |
| C. "No" to computer games | F. Saving space |

1. Safe, comfortable and green. Electric-powered cars will not produce any substances (вещества) which are dangerous for people and nature. In 10-20 years all cars will have their own built-in computers. These computers will help choose the best way to go and avoid accidents (избегать происшествий). You can even sit back and let the computer do the driving!

2. Nowadays, people working in offices use computers, which contain hundreds of documents. Do you know how much space these documents would take up, if they were printed on paper? They'd occupy (занимать) whole rooms! In many offices computers are linked in a network. This way, people can exchange information and messages without moving from their tables.

3. Technology has made it possible for more and more people to work from the place where they live. In this way, they don't waste so much time, because they don't have to go to the office every day. It also means less pollution in the atmosphere caused by transport.

4. Good-bye, pencils! Farewell (прощай), sheets of paper! These days cartoons are being made with a computer. The first-ever cartoon to be created by computer was "Toy Story" produced by Steve Jobs. A typical Walt Disney cartoon usually needs up to 600 designers. "Toy Story" was made using only 100. So, like so much of modern life, today's cinema seems to be falling more and more into the hands of the computer.

5. If we speak about the negative aspects of a computer game, probably the first thing that would come to our minds is that it isolates (отделять) a person from other people. Now the first virtual reality computer game has appeared which you can play in a group of 6 people at the same time. The game is called "The Loch Ness Expedition." Each player is given a role in the underwater expedition. Players have to cooperate (сотрудничать) to achieve the goal.

A Listening

Listen to some people talking about environmental problems. Match the speakers (1-5) to the statements (A-E)

A The speaker talked about the idea of using a car together.

B The speaker wants to do something for nature but it is not easy for him/her.

C The speaker doesn't think that the Earth will not recover from the damage it has suffered.

D The speaker found the way to cope with his/her problems after talking to neighbours.

E The speaker understood he/she had to do his part for the environment after watching a TV show.

A	B	C	D	E

B Reading

Match the headings to the paragraphs. There is one EXTRA heading.

1 Nature friendly clothes

4 The influence of the media

2 A famous costume-maker

5 Less than perfect

3 The history of clothes

6 We are what we wear

A A long time ago, clothes were simply a way of covering our bodies. Of course, there have always been preferences in one style or another, but fashion rarely used to define who we are. Today, things are different. Our clothes make a statement about our personality and our lifestyle. Teens, especially, associate the way they dress with the image they want to show others. It's not really about being fashionable anymore; it's more about showing our identity through our choice of outfit.

B William Ivey Long is one of the greatest costumes' designers of our time. His extraordinary work in Hairspray, Chicago and other Broadway and off-Broadway plays has won him five Tony awards and twice as many nominations. His costumes are clever, original and a perfect expression of the character they are created for. The highlight in Long's career was in 2006, when he was admitted to the Theater Hall of Fame.

C People have always had the need to set their own fashion trends, and there is no better witness to this fact than the Fashion Museum in Bath, England. With a display of original outfits dating from the 1700s to modern day, fashion enthusiasts will be thrilled to see not only real dresses worn by English kings and queens, but also some of the dresses made by the legendary Hollywood actress Marilyn Monroe.

D With more and more people turning their attention to our planet's growing problems, it's no wonder that the fashion industry is also doing so. Eco-safe materials, organic coloring substances and even clothes made from recycled materials are now easier to find and are becoming more and more popular with today's shoppers.

E The next time you feel unhappy because you don't have Nicole Kidman's porcelain skin, Jennifer Aniston's beautiful hair or David Beckham's muscular body, have a look through some gossip magazines. It might make you feel better to see pictures of your favourite Hollywood icons without their make-up on. Take a closer look at these star's pictures and you'll discover that many of them are ordinary-looking people, just like you and me!

A. Though Baikal is located in a very remote place, and is difficult to reach in autumn and winter, it attracts thousands of visitors every year. A chance to see this unique place is worth the long journey! On the banks of Baikal you can stay in a modern, comfortable hotel, take part in hiking tours and enjoy the untouched natural beauty. People who visit Baikal once want to return to the place again and again.

B. The world's deepest lake, Baikal, is in Siberia. It is also the largest freshwater lake in Eurasia and the oldest lake on Earth. At least 1,500 unique species live there – they cannot be found anywhere else on the planet! The water in the lake is so clear that if you drop a coin, it can be clearly seen a hundred feet below the water.

C. Everyone considers the Siberian climate very severe, which is perfectly true for the Baikal region. The winters there are really freezing: the average temperature is as low as 25 degrees Celsius. Due to its location in the middle of the continent, the place is characterised by a sharp contrast between winter and summer temperatures. The summers are generally cool, with a few hot days. The sun shines brightly above the lake till late autumn.

D. People who live in the Baikal region believe that it's a unique and mysterious place. According to them, the water from Baikal can cure different illnesses, gives you strength and clears your mind. They also say that the lake was formed millions of years ago when a huge, hot rock fell to earth. It melted the ice around and that was how Baikal appeared. The story about the meteorite has, however, never been proved by scientists.

E. The lake attracts not only tourists but also many wildlife researchers, biologists and even archaeologists. The world famous explorer and scientist, Jacques Cousteau, and his team spent lots of time studying the deep waters of Baikal. They also shot a film about their research that was broadcast by major TV channels all over the world.

F. However, the growing popularity of the lake and the industrial development of the region have caused ecological problems. The safety of this unique natural ecosystem has been discussed at an international level. Now Lake Baikal is on the list of heritage sites protected by UNESCO. A federal state law about the conservation of the lake was also supported in Russia.

|---------------------|-------------------------------|
| 1. A better system | 5. Too much homework |
| 2. The wrong goal | 6. Too many distractions |
| 3. Arguably helpful | 7. Extra-curricular over load |
| 4. Too stressful | |

A. My problem with homework is that I am rather fond of TV and computer games. Every evening after school it is the same. I start with the highest intentions. I'll just play one round of Final fantasy and then begin. But it tends to be three rounds and then tea time. Oh — and then my favourite program begins in 10 minutes so I'll start after that. And so it goes on. Probably I lack motivation.

B. It is so much faster doing homework these days. All our assignments can be done on the PC which means correcting and changing things is so easy. But of course the Internet is the biggest shortcut of all. Maybe it's true what they say that it stops you reading textbooks. You get snatches of information rather than the whole story. Maybe I should try to use the internet less.

C. I am a drummer and a pianist. The school really encourages this and I have two one hour lessons a week plus one to two hours daily practice. I am in the basketball team. The school encourages this and we practice twice a week. I got picked to be in the school play. Rehearsals are two hours a week. Will somebody please tell me when I am supposed to get my homework done?

D. Exam practice, constant revision, exam techniques and how to get the highest possible grade— is this what education is supposed to be about? The school seems obsessed with grades and the school results league table. We are currently 17th highest achievers in England but if we really try hard this year we might make top 10. Silly me! I thought education was about learning and preparing for adult life.

E. For some kids exams bring more pressure than they can cope with. They worry about what their parents will say, not to mention what their teachers or class mates will think. No wonder some of them freeze up in the exam hall and are unable to write anything out of sheer nerves.

F. Why do they do it? We get three weeks in a row with minimal homework and then every teacher in the school sets a massive assignment to be completed "by next Friday — no late submissions". Why don't they get together and try and even the load?

Final test (11th class)

1. READING

Прочитайте тексты и установите соответствие между текстами А–F и заголовками 1–8. Используйте каждую цифру только один раз. В задании есть один лишний заголовок.

- 1 Controlled by voice commands
- 2 Smartphones keep an eye on you
- 3 Manufactures will make changes
- 4 Disadvantages of smartphones

- 5 Services for smartphones
- 6 Computers based on neurons
- 7 Some computers will disappear
- 8 Why smartphones are convenient

- A. Over the last five years, smartphones have proved that they are immensely capable. They will represent more than 50 per cent of the mobile phone market in 2015. In 10 years, tablets will be archaic. Desktops and laptops, having already begun their slide into antiquity, will soon be nothing more than dusty relics and museum exhibits. The last and only bastion of consumer computing will be the smartphone.
- B. Some arguments for a larger device, such as the laptop, may still remain. For example, the interface. The keyboard is still the best way of inputting data, and some activities simply can't be performed on a 4-inch smartphone screen. Besides, there will always be people who need or want faster computers to speed up their workflow. Supercomputers which do calculations at the speed of nanoseconds are definitely not the size of smartphones.
- C. The reasons for keeping a laptop, desktop, or tablet may disappear because Apple and Google have developed speech recognition programs which can replace keyboard input. Usual displays will be replaced by head-up displays or wireless contact lens displays. Brain-computer interfaces will appear in the near future. A solid, immovable screen will not be in the centre of our interaction with multimedia any longer.
- D. Just think what it would be like if your smartphone was your only computer. You would always have your computer with you. All of your documents, photos, games, apps, and utilities would always be in your pocket, accessible at any time. If you want to check your messages, watch TV on the train, or edit a photo, just go to the menu. Moreover, you could use your smartphone as a passport or a credit card.
- E. With the help of a smartphone and a few apps, you just slide your phone in your pocket before your workout, and let the app track your speed and activity. Smartphones track your movements, and then pass the data off to commercial apps, or helpful services like Google Now. With additional sensors, they constantly monitor your activity and overall health. The dream of wearable computing will become true.
- F. There is a worldwide shift to mobile computing. Computers are becoming smaller and more efficient. If smartphones are the only consumer-oriented computers, production lines and equipment have to be updated to meet new requirements. With an atomic computing platform, smartphones would be cheaper and much more capable than they are today. Cloud computing would satisfy needs of those who want faster computers.
- G. It is important to develop our brains as well. Computer can do many complex tasks at the same time ("multitasking") that are difficult for the brain. For example, counting backwards and multiplying two numbers at the same time. However, the brain also does some multitasking using the autonomic nervous system. For example, the brain controls breathing, heart rate, blood pressure and at the same time it performs mental tasks.
